

● HORTI WINDFLOR® ROSE FILM

PRODUCT INFORMATION

Our Windflor® rose film is renowned for its excellent sealing properties. Our film runs well on all machines for rose packing.

In order to combat the botrytis fungus in the roses the crystal-clear BOPP can be given a row of micro-perforation or macro perforation (3, 5 or 8 mm perforations) in a pattern to be determined by the customer.

The print (full colour print up to 8 colours), will be extra 'glossy' with a layer of varnish, or by using a laminated film.

WHAT WE CAN SUPPLY

Windflor® rose film can be ordered in thicknesses of 25 to 50 micron, in any desired width and length, either printed or unprinted, with or without air holes.
