

● INDUSTRY LAMINATED FILMS, BARRIER PACKAGING

PRODUCT INFORMATION

Health, convenience and enjoyment ... the consumer wants to be helped with meal solutions. Maximum freshness, shelf-life, taste and presentation: that makes for high demands of the product and the packaging. Van der Windt, together with its associated manufacturing companies, is a trend setter in the development and supply of high-value flexible packaging materials for the food processing industry.

Van der Windt supplies unprinted and printed films for every possible application. Whether you are talking about packaging for fresh meat, poultry, cheese, sliced fruit, ready-to-cook vegetables, salads, ready-to-eat meals, meal components, filled rolls or sandwiches, Van der Windt has a solution. Films for thermoform machines, laminated films, sealable polyesters, barrier films, laser perforated films, for automated packaging using vertical, form-fill and closure machines, flowpack, topseal - Van der Windt is your reliable partner.

DELIVERY INFORMATION

Van der Windt stocks a wide range of unprinted films in different qualities for a multitude of applications:

- Anti-fogging films
- Automated packaging films
- Bio-based films including PLA
- Barrier films
- Thermoform films
- Laminated films
- Sealable polyesters
- Topseal film

Films can be printed using flexoprint and rotogravure. The specialists in Van der Windt's in-house design studio can develop a print design for you and prepare it for printing.
