

● HORTI PACKAGING FOR HERBS

PRODUCT INFORMATION

Van der Windt produces potted herb sleeves for leading herb growers throughout Europe. With our extremely smooth, strong Wentofan Super® (CPP) sleeves, even herbs with sticky leaves can be packed at high speed. The consistent quality of our sleeves guarantees optimum efficiency when packing, for both manual and machine processing. Sleeves for potted herbs are usually ordered for more varieties of herbs at the same time. By combining the production for the various herbs, we offer our customers advantages of scale. With a text change in the printing, for a minimum of 25,000 sleeves per herb, we put the right herb name and unique barcode on the sleeve. Our expert personnel help to set up and monitor a supply plan that takes seasons and peaks into account (e.g. special holidays) so that the customer can respond to sudden demand from supermarkets without having to worry about the availability of packaging.

PACKAGING FOR CUT HERBS

Van der Windt has a wide range of films available: flow packing, top seal and deep draw applications for cut herbs. For instance, we have anti-condensation films and multilayer films with barriers to extend the shelf life of the product.

Thanks to our vast experience, we can give you good advice about the right film for your product.

TRAYS FOR CUT HERBS

In combination with the film, we supply different kinds of trays for flow pack or top seal applications. We also have various re-closable trays (clamshell trays and trays with a base and a lid).

BIO PACKAGING

There is an increasing demand for bio based packaging for biologically grown herbs. Van der Windt has sleeves, films and trays made of biodegradable, compostable and renewable materials. (See also the BIO leaflet.)

HACCP

Under our own brand COMFORT®, we supply a complete range of HACCP articles from stock; such as latex and vinyl gloves, sleeve and shoe covers, aprons, hats and caps. (See also the HACCP leaflet.)
