

● INDUSTRIE WINDTUBE CRATE BAGS

PRODUCT INFORMATION

The Wind[Ⓞ]ube concept is THE solution for the manual or fully-automated insertion of a bag in a crate or box, which is then filled with products such as meat, chicken, sliced vegetables or flower bulbs.

The Wind[Ⓞ]ube bags are supplied as a bundle on tubes and are inserted into the crates or boxes with the help of a stand into which the tubes can be pushed very easily and which incorporates an ingenious system which ensures the bags always open.

Using the Wind[Ⓞ]ube bags instead of loose bags, or bags on a roll which must be torn off, means time savings, no bags or rolls lying around and an easy, fast, efficient and cost-effective way of working.

Wind[Ⓞ]ube bags: a perfect and low-cost packaging solution.

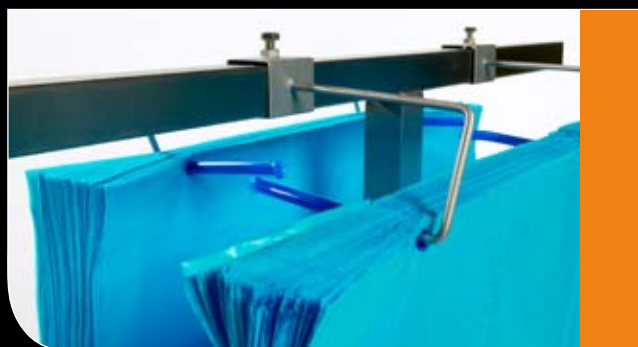

We will be happy to provide you with further information regarding machine and fully-automatic processing.

DELIVERY INFORMATION

HDPE or LDPE bags on special Wind[Ⓞ]ubes, a floor stand for the tubes, manufactured in stainless steel.

Van der Windt offers a number of standard sizes, but the bags can be adapted to suit the demands of the user's specific application.
