

● AGRI CONSUMER NET PACKAGING

PRODUCT INFORMATION

Van der Windt offers a wide range of traditional net packaging for products such as onions, shallots, garlic, nuts, potatoes, flower bulbs and other bulbous plants and vegetables. Extruded and knitted netting in various tube widths, with different mesh sizes and with special netting structures are available in a wide range of colours and on cuffs, in bales and on rolls. Machine processing is possible but also manual clipping. From luxury extruded tubular netting in white, for example for garlic, to a kilo of sprouts in a knitted green net. Van der Windt can also supply net packaging made of bio-based materials produced from renewable raw materials.

Van der Windt always has the right model available.

A 'net' with a beautifully printed label attached makes a practical and attractive consumer packaging.
